DETAILED ACTION

Allowable Subject Matter

Claims 1-16 are allowable over the prior art of record.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 17, 20 and 21 recite the limitation "return lumen" in the body of the claim.

There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by Lary. The referenced patent discloses a cannula having a lumen capable of having blood flowing therethrough, and an occlusion catheter having an occlusion member, the occlusion member having a collapse configuration adapted for introduction through the return lumen and an expanded configuration capable of occluding the ascending aorta.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 09/776,336

Art Unit: 3763

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 18-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lary in view of Lee. Lary does not specifically disclose a hemostasis valve use in combination with a catheter; however, such use of a hemostasis valve is conventional as evidenced by the teachings of Lee. Lee shows in figure 1, the use of a hemostasis valve with a catheter. Accordingly, it would have been obvious to modify the coronary instrument in Lary with a hemostasis valve as taught by Lee improving the overall capabilities of the catheter. Conclusively, the use of hemostasis valve in combination with a catheter is considered an obvious design alternative.

Conclusion

In view of the lack of antecedent basis issues with regards to the term "lumen", the examiner of record considers applicants' arguments with respect to the Lary reference to be moot. Accordingly, the examiner respectfully request applicant to amend the claims to provide the required antecedent basis in compliance with Section 112 requirements. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 703-308-2221. The examiner can normally be reached on 0730-1800 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Brian Casler can be reached on 703-308-3552. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3590 for regular communications and 703-305-3590 for After Final communications.
